### Description

➤One of the fastest twin engine helicopters available for air charter, the Agusta 109 is the most popular twin engine helicopter among VIPs, seating up to six passengers. Over the years the A109 has been extensively updated and improved, but the introduction of the A109E POWER achieves new heights of comfort, speed and payload. The Power's improved safety standards make operations from restricted or elevated landing sites achievable, even at its maximum operative weight.

### Remarks

➤Performance A (**Can continue take off or landing even on the unlikely event of an engine failure**)
