- **Crew:** 1
- **Cruise speed (kts):** 90
- **Range (nm):** 300

Description

Robinsons' 44 provides excellent reliability, responsive handling, and altitude performance, making the R44 the ideal helicopter for private, business and utility applications.

The R44 has comfortable seats, 3 passengers and a pilot, and their views are unobstructed due to the R44's open cabin design.

A low-tail rotor tip speed, heavy-duty muffler, and large cambered tail decrease flyover noise, resulting in a community friendly helicopter.

R44's have low environmental impact and performance that allow landing and take off in areas where other helicopters can not have access.
